SUMMARY

Top-performing student with excellent academic results and problem-solving skills. Currently learning Java Full Stack development and skilled in HTML, CSS, and Bootstrap. Eager to apply my technical knowledge and academic success to real-world challenges.

PROJECTS

TinDog :

- Concept: Tindog is an online dating site designed for dogs, helping pet owners find playmates or partners for their furry friends.
- Technologies: Developed using HTML, CSS, and Bootstrap to ensure a well-structured, styled, and responsive website.
- Features: Includes user profiles for dogs, search and matchmaking capabilities, and interactive photo galleries.
- Design: Utilizes Bootstrap for a mobile-friendly and visually appealing design.
- User Experience: Provides an intuitive interface with easy navigation and engaging profile management.
- GitHub Access: Access the project repository and code on GitHub: GitHub Repository
